Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The water system is not adequately described. There is no enablement for the recited means for filling the compartments with water as claimed in claim 1.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6-8, 19 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Saltzman et al. Saltzman et al discloses an ice maker having a closure member 18 for closing the bottoms of the ice making compartments 27.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3744

6. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saltzman et al in view of Meier. Saltzman et al discloses the claimed invention except for the open tops of the compartments. Meier teaches an ice maker having an ice casting unit 18 which has an open top 36. It would be obvious to provide Saltzman et al with open tops on the ice compartments, in view of Meier, for the purpose of ease of supplying the water to the compartments.

7. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saltzman et al in view of Karlovitz. Saltzman et al discloses the claimed invention except for the electrical heating wires. Karlovitz teaches an ice maker having heating wires 34 in the mold. It would be obvious to provide Saltzman et al with electric heating wires in the molds, in view of Karlovitz, for the purpose of simplifying the heating system for the molds.

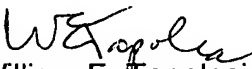

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
